

## HORIZONTAL UNDERGROUND WATER STORAGE TANKS

- Design of the product & the polymer used is to ensure the tank has longer life over & below the ground.
- Seamless Tank Construction.
- Maintenance free.
- Can be used for agricultural, industrial and domestic applications. Suitable for potable water storage.

### DIMENSIONS

**500 ltrs.**

**Length** - 1170 mm.  
**Height** - 820 mm.

**1000 ltrs.**

**Length** - 1680 mm.  
**Height** - 950 mm.

## HORIZONTAL UNDERGROUND SEPTIC TANKS

- Seamless tank construction stops contamination as no leakage of soiled water.
- Ready to install in any climate, hence no gestation period or curing time required.
- Doesn't contaminate ground water.
- Prevents cockroach breeding due to its smooth surface compared to conventional septic tanks.

### DIMENSIONS

**500 ltrs.**

**Length** - 1170 mm.  
**Height** - 820 mm.

**1000 ltrs.**

**Length** - 1680 mm.  
**Height** - 950 mm.

### INSTALLATION GUIDE FOR UNDERGROUND TANKS & SEPTIC TANKS :

- Excavate as per the dimensions of the tank with an addition of 150 mm. around the tank area.
- Provide firm base (150mm. RCC) at the bottom of the tank. Create a brick wall as per soil condition.
- Drill both the necessary holes by appropriate drilling tools and not by inserting hot pipe.
- Install the tank on the firm base.
- Fill half of the tank with water and then put soil and gravel till overflow level.
- Provide Air Vent Pipe on top of the tank.
- Ensure the manhole of the tank is above the ground level and lid is fitted properly every time it is opened for maintenance.

- Horizontal tanks are most popular within the agricultural industry. Within this industry the tanks are used to store and transport liquid agricultural chemicals such as pest control applications.
- Horizontal tanks are used in stationary locations where height and space restrictions might dictate the tank size and shape.
- Horizontal Tanks offer moulded in legs to keep the tank from rolling back and forth. There is no metal work and great for those who are cost conscious.
- These tanks are strong and light weight.

## DIMENSIONS

**1000 ltrs.**

**Length - 1490 mm.**

**Height - 1075 mm.**
